SUBJECT: **Glucose Paste Packaging Change**

APPLICABILITY: **ALL EMS Providers**

As the current stock of Glucose Paste is used or expires, it will be replaced by a new brand and packaging style. Dosing and administration procedures are exactly the same as with the current packaging. See below.

RATIONALE:

1. Smaller, more flexible packaging – each box takes up the space of 2 old tubes and carries three doses.
2. Cost savings – approximately 30% with comparable shelf life.
