

DEPARTMENT OF FIRE AND RESCUE SERVICES

	<h1>MEMORANDUM</h1> 2009.003	
---	---------------------------------	---

Originating From	Issue Date	Expiration Date	Attachments
Office of the Fire Chief	2/2/2009		

SUBJECT: Emergency Access to Stone Lake Subdivision

APPLICABILITY: All Operational Personnel

The entrance to Stone Lake (Box Area 06-01), via Stone Lake Drive off of Gorman Road, is controlled through an electronic gate. Normally, access is granted by the on-duty security person. When the security person is not available the gate sensor is set to “loud noise mode.”

To open the gate in “loud noise mode” use the electronic siren, in any setting, for 5-6 seconds. If the electronic siren does not work, try one of the other audible warning devices available on the unit. It may take as many as 30 seconds for the gate to activate.
